PUSH TO LOCK - HOSE ASSEMBLY TOOL PUSH TO LOCK - SCHLAUCH-MONTAGEWERKZEUG

SERIE HTA 10-13-PNM

1. Hose Actuator

Use the hose actuator to lift the housing and placing the hose. Speed of both hose and coupling actuators can be adjusted by the speed valves on the tool.

3. Hose housing

Place the Ø10 or Ø13 hoses into the correct housing.

4. Coupling housing

Place the couplings into the correct housing.

HOW IT WORKS

5. Air Connection Make sure the tool is connected to compressed air.

2. Coupling Actuator

Use the coupling actuator to move the coupling into the hose.

Built in housing HTA - KT1013 - 02

Spare housing HTA - KT1013 - 03

Press the hose actuator to lift the groove. Place the hose into the groove and press again to clamp it automatically.

Suitable Ø10 hoses for the application are; PLOK10 - PDLOK10 - WHMLOK10 - WHMDLOK10 and Ø12 hoses are; PLOK12 - PDLOK12 -WHMLOK12 - WHMDLOK12

Make sure the hose inlet is max 3 cm away from the housing inorder to keep the hose inlet stable and ready for assembly.

The hose inlet can either be perfectly aligned with the housing or max 3 cm away from the housing for an easier assembly of couplings.

Place the coupling into the suitable coupling housing and make sure the accurate housing is installed on the tool. If not, please replace the housing with the other housing which you will find in the box.

The housing kit can either be for SK-CSK90, SK-CSK60-90, SK-CSK90-90, 100.08 or HK-HVK9-90, HK-HVK9,100.08-90 type of couplings. EHF type of adaptors are also suitable for usage.

Press the coupling actuator to move the coupling into the hose automatically.

After the connection is provided, press again to proceed with the cycle.
